# FOOTMATCH

*Many times we come across huge queues or applications that are too complicated to be able to go to the stadium. Is it really worth it? Is there an alternative method? Yes, Footmatch is the answer to all this. This new web app was created with the intention of simplifying the purchase of tickets for your favorite teams and beyond!*

A soccer ball with black and white hexagonal panels is shown hitting a white goal net. The ball is positioned in the center-left of the frame, and the net extends from the bottom left towards the top right. The background is a blurred green field.

**Which app is it  
inspired by?**

Footmatch is inspired by the Ticketone web app, which allows users to purchase tickets for events such as sports, concerts, museums, and more. While using Ticketone is relatively straightforward, it does not facilitate precise searches for individual football events, which is what Footmatch aims to provide. By simply entering the team name, all relevant matches will be displayed without the need to sift through various events and sports

---

# But what does Footmatch really do?

Footmatch allows registered users to view the availability of tickets for Serie A teams' matches, including their European fixtures. Users can purchase tickets directly through the app using quick and easy payment methods. It's a user-friendly app suitable for everyone, regardless of their experience level.

Coming soon, don't miss out!!
